

Decoding RUS weaponisation of gas and CUI

MARSEC 4th Maritime Security Conference

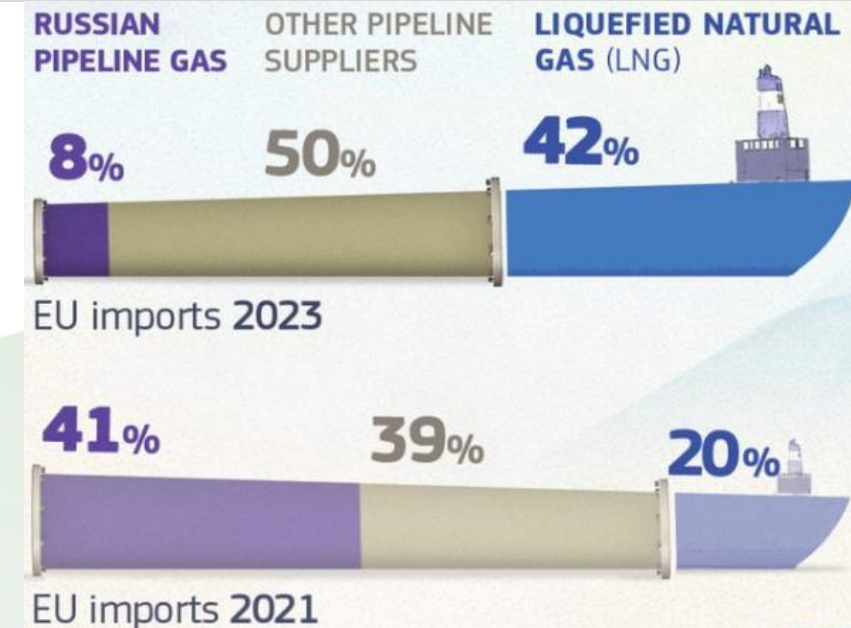

Today's MENU

1. European energy outlook vs. RUS energy weaponisation?
2. Europe's Achilles heel is CUI and tomorrow's CEI

1. European energy outlook

Europe's RUS energy phase out

- Energy diversification improves our resilience
- Secure fuel supply to the military
- Critical energy infrastructure protection

Russia's options are more limited...

- Ability to weaponise energy supplies for political gain & concessions
- Allies' and Partners' political and economic resilience

2. Tomorrow's energy infrastructure

Conventional and asymmetrical risks for Allies

- Increasing volume of new infrastructure
- Espionage & sabotage on critical infrastructure
- Energy transition increases cyber risks

Tomorrow's infrastructure brings new security challenges

- Protection of strategic energy infrastructure – a multi domain problem

Are we energized enough for Q&A ?
